The California League of Conservation Voters

The California League of Conservation Voters (CLCV) is the nonpartisan campaign arm of the environmental community in California. The League works to protect the environmental quality of our state by electing conservation-minded candidates to office and passing environmentally sound propositions.

With 45 Congressional districts and 120 state legislative seats, California clearly presents a formidable challenge to any grassroots organization. To meet this challenge, CLCV conducts early research on candidates for office and concentrates on races where environmental resources might be expected to make the difference in the outcome of a race.

We back our political endorsements with campaign expertise assisting candidates with the media, fundraising and grassroots strategies they need to win their races. Each year we assign experienced campaign organizers to the very closest environmental contests in the state. On Election Day, we comb the precincts getting environmental voters to the polls for our candidates.

League canvassers also communicate directly with hundreds of thousands of Californians every year. In addition, to providing information on legislators' environmental voting records, they register voters, recruit volunteers, generate letters to targeted representatives, and identify "conservation voters".

Each year we publish our *Legislative Voting Chart* to help voters distinguish between the rhetoric and the reality of a legislator's environmental record. In recent years as more and more candidates have sought to appeal to California's "environmental vote", this information has become increasingly important.

For more information about CLCV please contact us at one of our two offices:

12234 West Pico Blvd.
Los Angeles, CA 90064
(213) 826-8812

965 Mission Street
Suite 705
San Francisco, CA 94103

The Legislative Process

The route a bill takes through the Legislature is a little perplexing but follows a basic pattern. First, the bill is formally introduced by a member of the Legislature. It is given a number, has its first reading, and is assigned by the Rules Committee to an appropriate committee for review.

The Committee review process is critical. Most bills pass through one policy committee (such as Toxics) and one fiscal committee (such as Appropriations) in each house. It is in these committees that bills are either tabled for further study, passed, or killed.

Because 1989 represents the first half of the two year legislative session, legislation that is tabled for further study in committee (or on the floor) can become a two year bill.

If passed by the committee, the bill is given a reading on the floor. Committee and floor amendments are adopted, the bill is rewritten, and the floor debate begins. On the floor, a bill can either be passed, defeated or referred back to

committee. To pass, a bill needs an absolute majority vote; twenty-one in the Senate, and forty-one in the Assembly. This means that legislators who are absent or choose not to vote are in effect voting "no."

Once a bill passes the house where it originated, it goes to the other house where it can be passed in identical form, defeated, or amended. If it is amended in a way that is not satisfactory to members of the first house, three members of each house form a conference committee to work out an acceptable compromise. If a compromise cannot be worked-out, the bill dies.

If a bill passes through both houses, it goes to the governor who can either sign the bill, veto it, or ignore it. If after twelve days the governor hasn't acted on the bill, it becomes a law without his signature. If vetoed, a two-thirds vote in both houses can override the veto.

Speak out!

You have the power to express your approval or disapproval of your representatives' performance by casting an environmental vote on Election Day. In addition, contrary to public speculation, legislators rarely hear from their constituents. Because so few people take time to contact their representatives, one letter is often counted as representing the opinion of 500 other voters. During the legislative session letters to representatives can be sent to:

California State Assembly
PO Box 942849
Sacramento, CA 94249-0001

California State Senate
PO Box 942848
Sacramento, CA 94248-0001

District office addresses and phone numbers are listed in the state government section in the front of your phone book under "Assembly" and "Senate".

How To Use This Chart

The CLCV Legislative Voting Chart evaluates the 1989 California Legislature on a broad range of environmental issues. The chart lists votes cast both in committee and on the floor on key bills relating to the environment. The votes tabulated in the chart are considered by the environmental community to be the most significant votes for each bill. They are not necessarily the final roll call votes for each bill.

Pro-environmental votes are designated with an 'x', while anti-environmental votes are denoted with an 'o'. Members who were absent or not voting at the time the vote was taken received a dash (-).

The scores to the right of each legislator's voting record represent the percent of environmentally correct votes, excluding absences. Every legislator who voted on at least 60% of the key environmental legislation in 1989 is given a score. Legislators with five or more cumulative committee votes are given committee scores in addition to their floor scores. We encourage our members to check their legislators' attendance records and ask them for an explanation if there is an unreasonable number of missed votes.

Key

x = pro-environmental vote

o = anti-environmental vote

- = absent or not voting

Voting Summary

State Averages

Senate

Overall	80%
Republicans	60% (15)
Democrats	92% (24)
Independent	95% (1)

Assembly

Overall	70%
Republicans	33% (32)
Democrats	96% (47)

Highest Scores

Senate

100%: Hart (D-18), Keene (D-2), Marks (D-3), Petris (D-9), Rosenthal (D-22), Watson (D-28).

95%: Davis (R-19), L. Greene (D-6), Kopp (I-8), Lockyer (D-10).

Assembly

100%: Bates (D-12), Bronzan (D-31), W. Brown (D-17), Burton (D-16); Campbell (D-11), Connelly (D-6), Eastin (D-18), Epple (D-28), Farr (D-28), Friedman (D-34), Hannigan (D-4), Harris (D-13), Hayden (D-44), Hughes (D-47), Katz (D-39), Killea (D-78), Klehs (D-10), Lempert (D-20), Margolin (D-45), Moore (D-49), O'Connell (D-35), Roybal-Allard (D-56), Sher (D-21), Speier (D-19), Tanner (D-60), Tucker (D-50), Vasconcellos (D-23), M. Waters (D-48).

97%: Cortese (D-24), Filante (R-9), Isenberg (D-10); Johnston (D-26).

96%: Bane (D-40), Calderon (D-59), Polanco (D-55).

13%: Johnson (R-64)
14%: Frizzelle (R-69)

1989 Environmental Legislation

TRANSPORTATION

Freeway building and single occupancy auto travel continue to be the cornerstone of transportation policy in California. As a result, the state's air pollution and urban sprawl problems continue to multiply as our mass transit infrastructure (rail lines, trains and stations) continues to decay. This year, to the surprise of many observers, the legislature and the governor managed to agree upon a comprehensive transportation package which includes several strong environmental provisions. Its fate will be determined in June of 1990, when two connected ballot measures are presented to the voters. One measure allows for an increase in the state's gasoline tax to fund transportation projects. The other is a bond measure to provide revenue for rail systems. The gas tax measure will fund some mass transit rail systems as well as some highway projects which the environmental community is still evaluating. We are supporting Assembly member Costa's rail bond measure and another ballot measure entitled the Clean Air and Rail Transportation Bond Act, which was drafted and qualified by statewide environmental groups last year.

1 Rail Bond

AB 973 (Costa) authorizes the first \$1 billion of an eventual \$3 billion bond act to be used for the construction of intercity and intracity rail passenger transit projects. **YES** is the pro-environment vote as indicated by an x. **Signed by the governor; subject to voter approval on the June 1990 ballot.**

RECYCLING

California communities generate garbage at nearly twice the rate of the country as a whole and experts predict that 70% of the state's urban areas will be out of landfill space within eight years. As a result, no environmental issue received more high level attention in Sacramento this year than solid waste management and recycling. The legislature passed a comprehensive recycling package this year, with ambitious legislation designed to make recycling easier, create markets for recycled products, and drastically reduce California's waste.

The final package (authored by Assembly Member Byron Sher) requires cities and counties to implement plans for a 25% reduction in their waste streams by 1995, increasing to 50% by 2000. The governor signed the bill but only after the language was rewritten to maximize his influence over choosing the members of the state's Solid Waste Management Board. Environmentalists remained neutral on the final version of Sher's bill because of the governor's provisions. Consequently, we feel the votes on AB 80; a recycling bill by Assembly Member Lucy Killea, are the best indicators of support for strong recycling legislation. Killea's bill was the main waste reduction bill

sponsored by environmental groups. Almost all of the recycling provisions in Killea's bill were subsequently folded into Sher's legislation.

2 Statewide Recycling

AB 80 (Killea) would require cities and counties to implement plans to recycle 25% of their waste by 1996 and 50% of their waste by the year 2000. It also transfers state recycling oversight responsibility from the industry dominated Waste Management Board to the Department of Conservation. **YES** is the pro-environment vote as indicated by an x. **Held on the Senate floor by the author. Major points incorporated into other legislation.**

3 Plastics Recycling

AB 2199 (Bates) would require cities and counties to prepare and implement a plastics recycling plan and would require the Department of Conservation to levy a fee on non-recyclable plastic products to pay for market development programs. **YES** is the pro-environment vote as indicated by an x. **Two year bill held on the Senate floor.**

4 Newsprint Recycling

AB 1305 (Killea) requires major newsprint consumers, such as newspapers, to use 25% recycled newsprint immediately, with timed increases bringing the consumption up to 50% by the year 2000. The bill creates a much-needed market for used newsprint, which is presently suffering a huge supply glut, often making it more economical for used newsprint collect&s to dump the paper into a landfill rather than to recycle it. **YES** is the pro-environment vote as indicated by an x. **Signed into law.**

5 Bottle Redemption

SB 1221 (Hart) strengthens California's weak bottle bill program by increasing the refund value from one cent per container to two and a half cents per container. Large containers, chiefly one and two liter plastic bottles, will be worth five cents. Any container that does not achieve a 65% recycling rate by 1992 will be raised to five cents at that time. During the Senate Floor debate, Senator Campbell offered an amendment to weaken the bill, and the vote to defeat this amendment is, included on the chart. **NO** is the pro-environment vote on Campbell's amendment on the Senate floor (5a). **YES** is the pro-environment vote on the bill (5). Good votes are indicated by an x. **Signed into law.**

6 Weak Statewide Recycling

SB 1261 (Bergeson) would have placed comprehensive recycling programs under the jurisdiction of the industry dominated Waste Management Board, and changed the Board member requirements to increase industry influence. This bill was introduced as a very weak, industry supported alternative to offset stronger proposals supported by environmentalists. **NO** is the pro-environment vote as indicated by an x. **Substantially changed on the Senate floor, environmentalists withdrew their opposition.**

PARKS

As California's population continues to grow, so too does the demand for park land and outdoor recreation. At the same time, opportunities to preserve and protect parks and wildlife habitat dwindle as the state's wildlands are lost to poorly planned development. This year was a relatively good year for state parks. The legislature defeated a measure that would have permitted off-road vehicles to roll over fragile desert lands in Southern California and passed a bond measure for the acquisition and rehabilitation of state park land.

7 Park Bond

AB 145 (Costa) would authorize the sale, over several years, of over \$874 million in bonds which would provide funds for the acquisition, development, rehabilitation and reforestation of state and local parks, beaches and wildlife habitat. **YES** is the pro-environment vote as indicated by an x. **Two year bill held on the Assembly floor.**

8 Anza Borrego

SB 603 (C. Green, Doolittle, Maddy) would have authorized the use of off-highway vehicles (OHV's) in Anza Borrego State Park. The fragile desert park has been protected from OHV use since May 1987 when the park staff issued a study documenting the damage caused by OHV's to soils, vegetation, wildlife, fossil records, and cultural artifacts. The bill would have allowed dune buggies, motorcycles, and all-terrain-vehicles to destroy the desert's delicate resources. **NO** is the pro-environment vote as indicated by an x. **Defeated in Senate Natural Resources.**

LAND USE

California's population is expected to double by the year 2030. As a result, local governments all over the state are faced with important land use decisions about how to accommodate new houses, businesses, roads and schools in their communities without destroying their own quality of life. Most of these land use decisions come in the form of General Plans and local growth control initiatives. This year several legislators took it upon themselves to assist the real estate and building industries in their efforts to thwart local growth control ordinances. At the

same time, some of the more positive attempts to guide the local land use planning process were stalled by the legislature. However, one bright spot in the broad area of planning is the transportation package now headed for the June 1990 ballot (see Transportation). In the meantime, proponents of managed growth will continue to battle the real estate and building industries which support easier and faster growth.

9 Construction

AB 1290 (Hauser) would have forced communities throughout the state to accept increased residential development with no regard for traffic, loss of open space, air pollution or any of the other problems associated with increased development. Under current law, local communities are supposed to accommodate their "Fair Share" of allocated housing, based on the state's housing needs. Hauser's bill would have enabled the state to use the Fair Share law to skirt local land use restrictions aimed at addressing problems that could destroy the quality of life for local communities. **NO** is the pro-environment vote as indicated by an x. **Substantially changed in Assembly Ways and Means, environmentalists withdrew their opposition.**

Greenbelt Alliance

10 Transportation Planning

AB 35 (Eastin) would require governments to include a transportation element in their General Plan and to correlate local transportation with the other land use and regional transportation elements of the General Plan. **YES** is the pro-environment vote as indicated by an x. **Two year bill held in Senate Appropriations.**

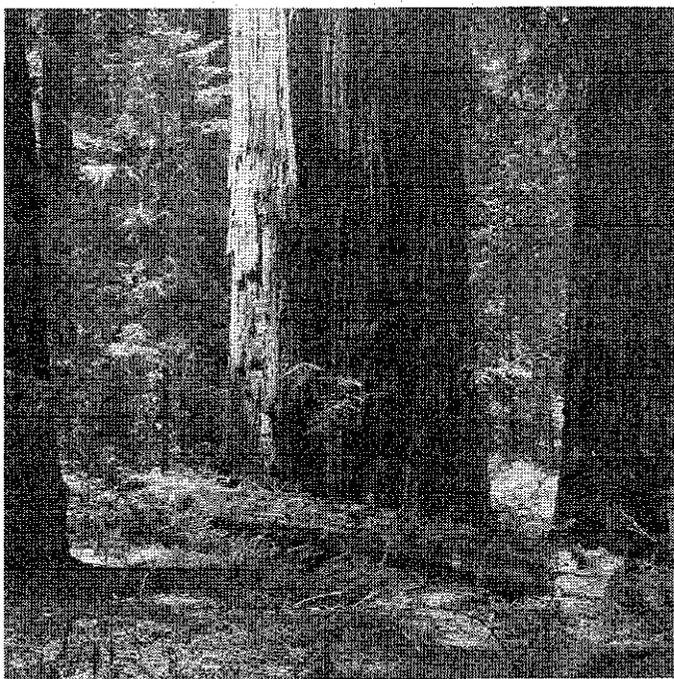

11 Building Permit Extensions

AB 1661 (Costa) would have undermined the purpose of local growth control initiatives by

granting an automatic nine month extension to residential building permits after any local land use initiative limiting construction is approved. Costa's bill would have encouraged developers to stockpile building permits before local growth control initiatives are passed. **NO** is the pro-environment vote as indicated by an x. **Amended in Assembly Ways and Means, environmentalists withdrew their opposition.**

12 Housing Policy

AB 2236 (Costa) would deny state housing assistance to any local government which had adopted, by initiative or action of local governing body, any growth control ordinances. **NO** is the pro-environment vote as indicated by an x. **Substantially changed in Assembly Ways and Means, environmentalists withdrew their opposition.**

Save-the-Redwoods League

13 Infrastructure Financing

AB 2460 (Hannigan) would simply require that before approving a development project, public agencies must demonstrate the ability to finance the necessary roads, schools, sewer systems, and other public facilities directly related to the development project.

YES is the pro-environment vote as indicated by an x. **Two year bill held in Senate Local Government.**

14 Williamson Act

AB 284 (Hannigan and Jones) updates funding for the Williamson Act, which since 1965 has protected millions of acres of farmland, wildlife habitat and watershed lands from being swallowed by urban sprawl. The Act works by providing tax breaks to landowners who agree to

keep their lands in agricultural production. Although the state reimburses local governments for a portion of the lost taxes, the rate of reimbursement has not been increased since 1974, while inflation has climbed 117%. As a result, some of California's financially strapped counties are proposing to end their participation in the program. AB 284 partially closes that tax revenue gap by updating the reimbursements to a more realistic figure. **YES** is the pro-environment vote as indicated by an x. **Signed into law but funding cut in half by Governor.**

Timber

Although several forestry bills occupied the environmental agenda in 1989, the big news on forestry issues this year was, unfortunately, bad news. North Coast Assembly Member Dan Hauser engineered the defeat of a bill by Assembly Member Byron Sher designed to protect the unique habitat and timber resources of California's dwindling virgin old-growth forests.

On other timber issues, environmentalists basically held their own, managing to stop or amend-damaging bills and to see the enactment of some tentative steps forward in the form of mandated studies of old-growth forests and on-site inspections of commercial timber harvests. However, based on the special interest finagling from this year, many environmentalists believe that it is simply impossible for any improvements to California's timber harvest laws to emerge from the legislative process.

15 Sustained Yield

AB 390 (Sher) would have established a "sustained yield" program to prohibit clear cutting of virgin old growth trees on private land. Sher's bill was designed to encourage timber to be removed selectively in order to-protect jobs as well as wildlife habitat.

Assemblymember Hauser dealt a fatal blow to Sher's bill by attaching 2 sets of damaging amendments on the Assembly floor. **YES** is the pro-environment vote in the Assembly Committees, **NO** is the pro-environment vote on Hauser's amendments on the Assembly Floor. Good votes are indicated by an x. **Killed on Assembly Floor by Hauser's amendments.**

Toxics

Unfortunately toxic pollution, has affected almost every aspect of California's environment. From contaminated groundwater near hazardous waste sites to pesticide residues on food to toxic air pollution from incinerators, Californians absorb toxics from many sources. 1989 was a relatively slow year for toxics legislation in the state legislature. Many of the bills listed on this year's chart became two year bills as lawmakers attention was diverted to other areas of environmental concern. The bills that the governor did sign this year were significantly weakened due to lobbying by his administration. The governor also vetoed several bills and

maintained his reluctance to fully implement Proposition 65, the landmark toxics initiative passed by California voters in 1986.

16 Incinerators AB 58 (Roybal-Allard) requires an environmental impact report and additional public notice for all hazardous waste incinerator projects. **YES** in the pro-environment vote as indicated by and x. **Signed into law.**

17 Incinerator Permits AB 411 (Roybal-Allard), would have required the Department of Health Services to deny hazardous waste incinerator permits to applicants who have a recurring pattern of violating hazardous waste laws. The bill would have also allowed Air Pollution Control Districts to deny permits for similar reasons. **YES** is the pro-environment vote as indicated by an x. **Vetoed by the Governor.**

18 Pesticides AB 417 (Connelly) would require the phase-out of fifteen of the most dangerous cancer causing pesticides, and substantially increase funds for research on alternatives to pesticide use. The bill would also require pesticide contamination limits to be based on potential exposure to children, and would transfer authority on health related issues from the Department of Food and Agriculture to the Department of Health Services. **YES** is the pro-environment vote as indicated by an x. **Bill withdrawn by the author because of lack of support in the Assembly. This proposal was folded into The Environmental Protection Initiative; subject to voter approval on the November 1990 ballot.**

19 Toxics Truth Act AB 1728 (Katz) would require companies to report critical information -about their use of toxics and require the state to make the data accessible and usable. **YES** is the pro-environment vote as indicated by an x. **Two year bill held in Senate Appropriations.**

20 Source Reduction SB 14 (Roberti) encourages industries to develop technical changes in their production processes to reduce toxic by-products. This is a revised version of a bill that the governor vetoed last year. **YES** is the pro-environment vote as indicated by an x. **Signed into law.**

21 Farmworker Right-To-Know SB 356 (Petris) would bring the rights of farmworkers up to the standards of other California workers who are required by law to be informed of workplace hazards. **YES** is the

pro-environment vote as indicated by an x. **Two year bill held on the Assembly floor.**

Coastal Protection

The California Coastal Commission, which since 1972 has worked to protect and preserve California's magnificent coastline, has suffered substantially under the Deukmejian Administration. Since 1983 the governor has cut the commission's budget by 30%. In 1989 Deukmejian continued his quest to abolish the commission by slashing the budget another 9%.

Another bitter disappointment was the governor's veto of SB 467 by Senator Ed Davis (see below). Although previous attempts to strengthen the power of the Coastal Commission had failed, hopes of avoiding a veto this year were high because Davis, a conservative Republican, agreed to carry the bill.

Assembly Speaker Willie Brown and Senate Rules Committee Chair David Roberti also deserve blame, however, for appointing several coastal commissioners who have been hostile to environmental concerns.

22 Coastal Erosion AB 874 (Farr) would have required, the Coastal Commission to consider non-structural methods of preventing shoreline erosion when issuing a permit. **YES** is the pro-environment vote as indicated by an x. **Vetoed by the Governor.**

23 Santa Barbara Sanctuary AB 893 (O'Connell) would extend the state's ocean sanctuary protection (which prohibits oil and gas development in waters within three miles of the shoreline) to a specified area off Santa Barbara County. **YES** is the pro-environment vote as indicated by an x. **Withdrawn by the author because of lack of support in Senate Governmental organizations.**

24 Coastal Commission Disclosure AB 1735 (Friedman) would require Coastal Commission members to disclose any off-the-record communications they have with individuals attempting to influence their decisions on matters before the Commission. **YES** is the pro-environment vote as indicated by an x. **Two year bill held on the Senate floor.**

25 Coastal Commission Authority SB 467 (Davis) would have given the Coastal Commission the authority to issue cease-and-desist orders to immediately stop illegal coastal development. Current law requires the Coastal Commission to obtain court injunctions to halt construction. This modest law enforcement provision would have been a tremendous help in halting illegal development along the state's coastline. **YES** is the pro-environment vote as indicated by an x. **Vetoed by the Governor.**

Water

Nothing is more fundamentally important to California than its water supply. For years a battle has raged between the north, the receptacle for most of the state's rain and snow, and the south, home to most of the state's population and the agribusiness community. The issue is how much of the north's water will be shipped southward and under what circumstances. 1989 started out with some potential threats to environmental water interests, including legislation to radically alter the state public trust doctrine and to promote the building of the Auburn Dam. For now, both of these bills are being held in the Legislature. On the bright side, the Legislature and the Governor did agree on two bills designed to protect some of California's remaining wild rivers as well as the endangered Mono Lake basin.

26 Mono Lake

AB 444 (Isenberg & Baker) encourages the City of Los Angeles and the Mono Lake Committee to reach an amicable solution by making money available to Los Angeles for new water and power sources to replace the water currently diverted from Mono Lake's feeder streams. **YES** is the pro-environment vote as indicated by an x. **Signed into law.**

27 Wild and Scenic Rivers

AB 1200 (Sher) gives State Wild and Scenic River protection to portions of the East Carson and West Walker Rivers and includes special prohibitions against development projects on portions of the McCloud River. These are the first additions to the State Wild and Scenic River System since its creation in 1972. **YES** is the pro-environment vote as indicated by an x. **Signed into law.**

28 Public Trust

SB 614 (Doolittle) would radically change the "public trust doctrine". Doolittle's bill would alter the doctrine to give a higher preference to the rights of existing upstream water users over the state's obligation to protect aquatic habitats that lie downstream. **NO** is the pro-environment vote as indicated by an x. **Two year bill held on the Senate floor.**

29 Auburn Dam

SB 1712 (Ayala) would allocate over \$1 billion in bonds for construction of the controversial Auburn Dam. The dam would flood over 48 miles of the American River, one of California's most scenic and heavily used recreation areas. **NO** is the pro-environment vote as indicated by an x. **Two year bill awaiting next committee assignment**

Air Pollution

The growing consensus in the scientific community is that without quick and decisive action, we face a growing deterioration of the earth's ozone layer as well as a significant increase in global warming. California legislators addressed the threat of global warming and ozone layer depletion this year with some commendable legislation. Unfortunately, the governor vetoed all of these bills, saying he preferred to wait for further studies and analyses.

While not unexpected, the Governor's veto of 1989's air pollution bills was a double disappointment after last year's successful passage of the landmark California-Clean Air Act authored by Assemblyman Byron Sher. This year in addition to axing further efforts to control California's contribution to global air pollution, the governor continued to thwart legislative efforts to fund and expand the state's existing clean air laws.

30 Air Pollution Control Funding

AB 1130 (Sher) would have authorized the state's poorly financed Air Pollution Control Districts to levy surcharges on Motor Vehicle Registration fees, to enforce the reduction of motor vehicle emissions and to implement Clean Air Act requirements. **YES** is the pro-environment vote as indicated by an x. **Vetoed by the Governor.**

31 CFC Phase Out

AB 1718 (Hayden) would phase out the use of chlorofluorocarbons and other ozone-depleting chemicals and would develop a program for recycling the chemicals in several of their current uses. **YES** is the pro-environment vote as indicated by an x. **Two year bill held in Senate Natural Resources. This proposal was also folded into the Environmental Protection Initiative; subject to voter approval on the November 1990 ballot.**

32 CO2 Reductions

AB 2151 (W. Brown & Vasconcellos) would have required the Air Resources Board to develop an inventory of the sources and quantities of greenhouse gases and to develop air quality control strategies to reduce the greenhouse effect. The bill would have also required the Energy Commission to develop programs to reduce greenhouse gas emissions. **YES** is the pro-environment vote as indicated by an x. **Vetoed by the Governor, much of this proposal was folded into the Environmental Protection Initiative; subject to voter approval on the November 1990 ballot.**

33 Global Warming Task Force

AB 2395 (Sher) would create a Global Warming Interagency Task Force to coordinate state planning and research on global warming. The bill would also require state agencies to

determine how global warming would affect their activities and to submit a contingency plan by July 1990. **YES** is the pro-environment vote as indicated by an x. **Two year bill held in Senate Appropriations.**

34 CFC Recycling

SB 116 (Rosenthal) would have required the CFCs used as coolant in commercial and industrial refrigeration systems to be pumped into a containment tank to be reused. Currently, these chemicals are vented into the atmosphere during routine repairs of the appliances.

YES is the pro-environment vote as indicated by an x. **Vetoed by the Governor. Much of this proposal was folded into the Environmental Protection Initiative; subject to voter approval on the November 1990 ballot.**

35 Greenhouse Effect

SB 427 (Torres) would have required the Energy Commission to develop strategies to reduce carbon dioxide emissions, and would have required various state agencies to study strategies for California to discourage rainforest destruction. The bill would have also made global warming a part of the California Environmental Quality Act, forcing it to be considered during the preparation of environmental impact reports.

YES is the pro-environment vote as indicated by an x. **Vetoed by the Governor.**

36 Air Violations Enforcement

AB 1737 (Friedman) would have eliminated the cumbersome requirement for state and local agencies to prove intent or negligence when prosecuting violators of pollution abatement orders and, instead, shifted the burden of proof from the local pollution district to the cited industries. **YES** is the pro-environment vote as indicated by an x. **Vetoed by the Governor.**

37 CFC Reduction

SB 231 (Roberti) would have required the Air Resources Board to adopt a program to either reduce CFC emissions or to eliminate specific uses of CFCs. **YES** is the pro-environment vote as indicated by an x. **Vetoed by the Governor.**

Wildlife

There are over 250 animals and plants on the state's list of rare, threatened and endangered species. As California's population continues to grow, opportunities to protect the state's diverse plant and animal populations dwindle. Surprisingly, wildlife activists have had to rely on the courts and the initiative process rather than the governor and the legislature to protect California's vanishing wildlife. 1989 proved to be no different from previous years as frustrated activists turned to the Wildlife Protection Initiative of 1990 for solutions.

38 Mountain Lion

AB 860 (Katz) would prohibit the sport hunting of mountain lions in California, and provide funds to acquire critical wildlife habitat.

YES is the pro-environment vote as indicated by an x. **Withdrawn by the author because of lack of support in the Assembly. This proposal was folded into the Wildlife Protection Initiative; subject to voter approval on the June 1990 ballot.**

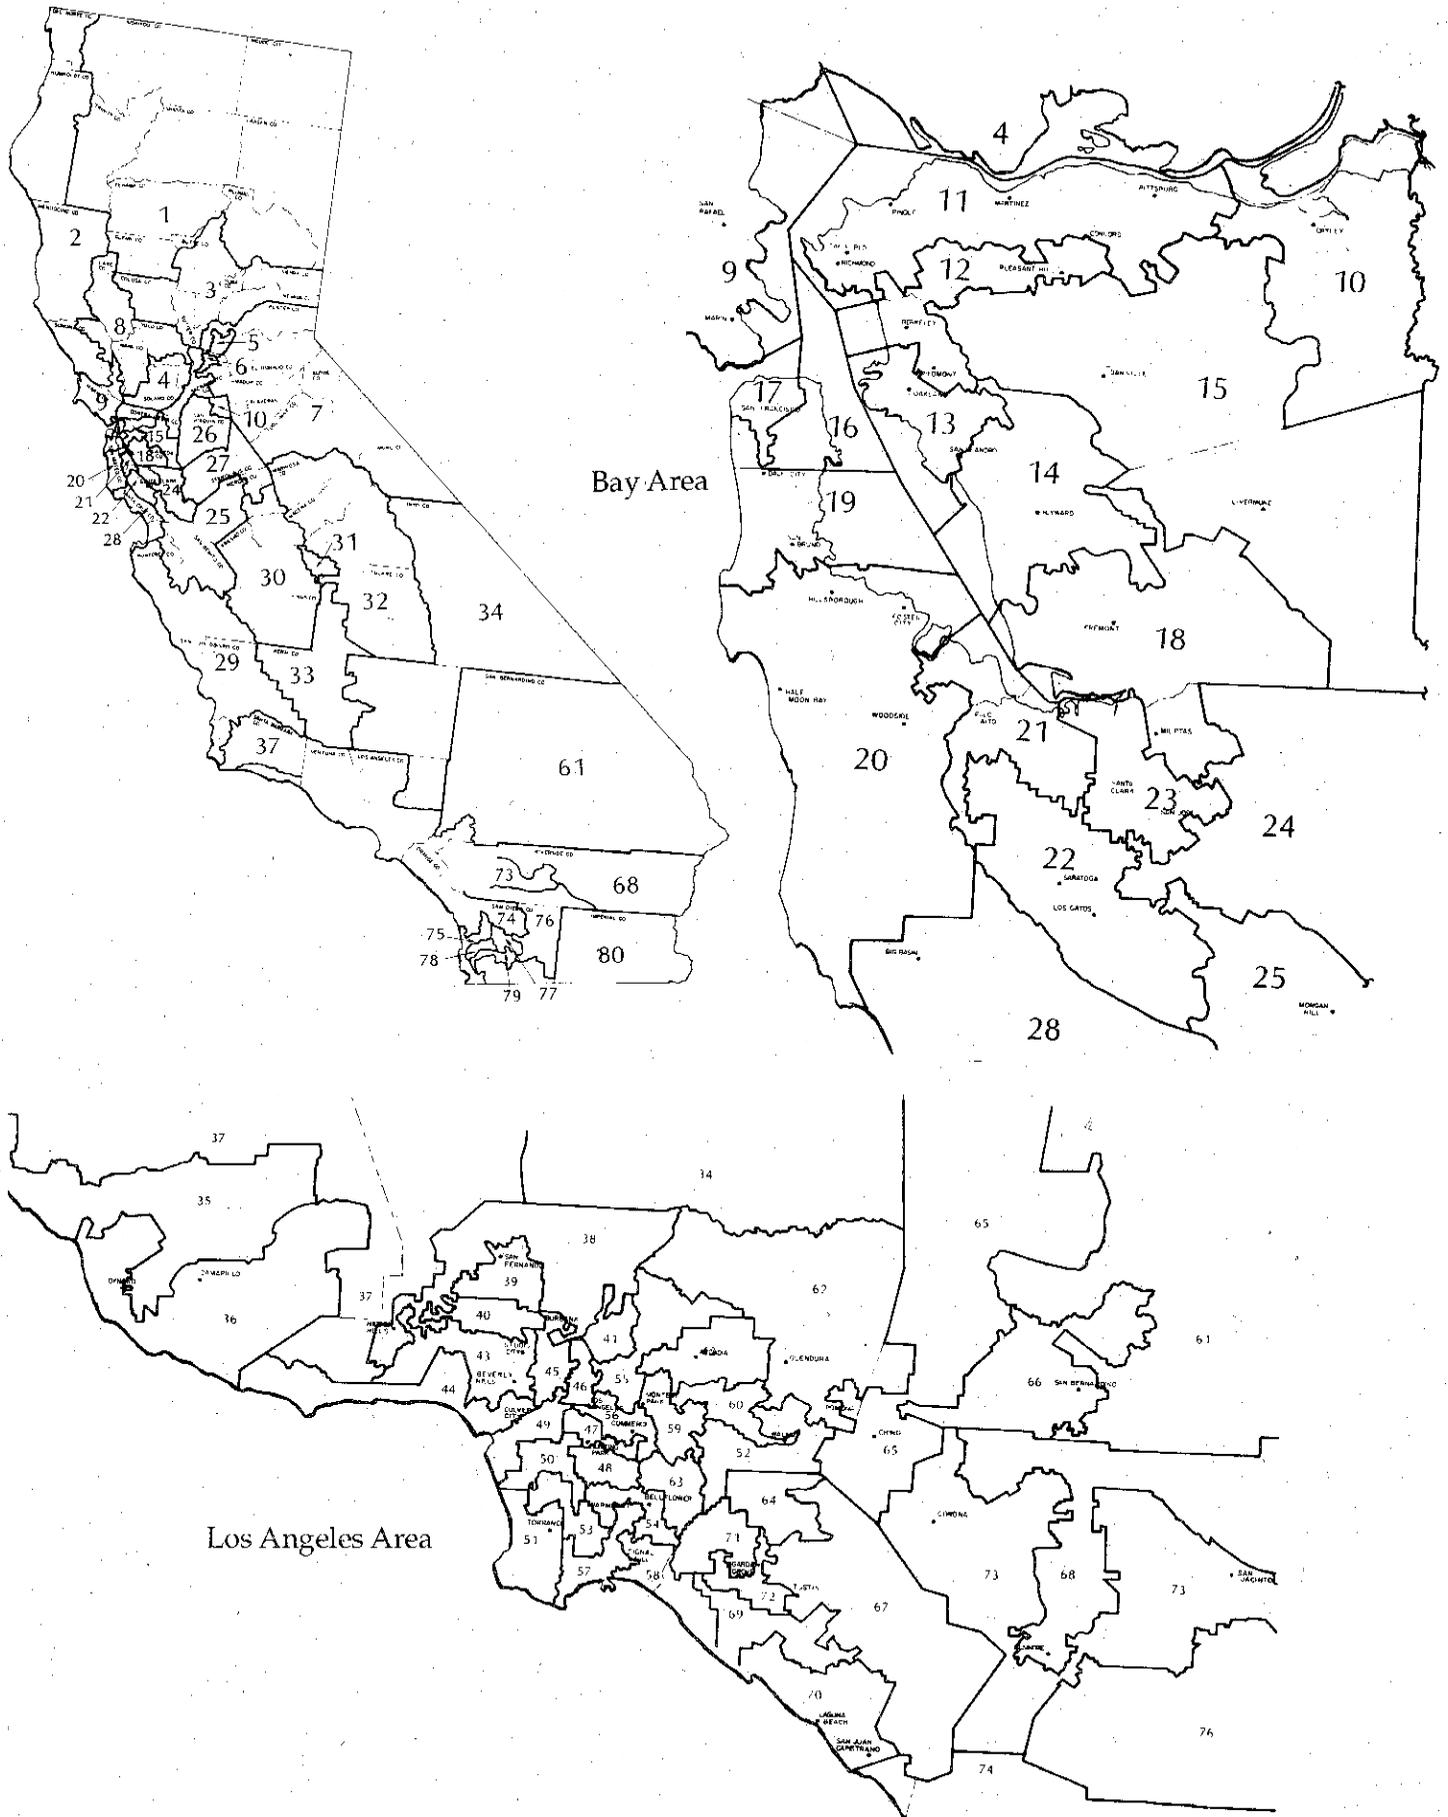

39 Endangered Species

SB 999 (McCorquodale) would have improved the process for listing a species on the threatened or endangered species list. Existing law allows the Fish and Game Commission to determine if a listing is warranted, and only then hold a public hearing. SB 999 would have required the Commission to hold a public hearing for any petitioned species. **YES** is the pro-environment vote as indicated by an x. **Vetoed by the Governor.**

40 Habitat Acquisition

AB 2290 (Chandler) would unnecessarily delay the acquisition of new habitat areas by requiring the Department of Fish and Game to draft a management plan for each of the areas they intend to purchase before they buy the property. **NO** is the pro-environment vote as indicated by an x. **Two year bill held in Assembly Ways and Means.**

Assembly Districts

Assembly Roster

Below is a district-order listing of Assembly Members during the 1989 Legislative session. The description for each Assembly Member includes a listing of their environmental committee assignments, a geographical description of their district and a brief history of their environmental scores on the floor(F) and in committee(C). To contact your Assembly Member about his or her environmental voting record (or any other legislative matter) please write to:

Member of Ways & Means.
Imperial Beach, Coronado, La Jolla, Del Mar, Poway, and part of the city of San Diego.
1989: 38% F, 50% C
1988: 27% F
1987: no score

76. Hunter, Tricia
Hunter was elected to this seat in the fall of 1989. She replaced Bill Bradley who died earlier that year. Neither Bradley nor Hunter voted during the 1989 Legislative Session.

Parts of San Diego County including Escondido, Casa del Oro and a piece of Chula Vista and the Riverside County desert regions of Indian Wells, Palm Desert and Rancho Mirage.

77. Bentley, Carol (R)
Full-time legislator
Elected in 1988.
El Cajon, Santee, La Mesa, and part of San Diego.
1989: 26% F

78. Killea, Lucy (D)
Full-time legislator
Elected to the Assembly in 1982, elected to the Senate in 1989. This seat is now vacant and will be filled by a special election in the Spring of 1990.
Member of Transportation; Ways & Means.
Northern portion of the city of San Diego including La Mesa, East San Diego, Balboa Park and Old Town.
1989: 100% F, 100% C
1988: 89% F, 80% C
1987: 78% F, 100% C

79. Chacon, Peter
Educator
Elected in 1970.
The southern portions of the city of San Diego.
1989: 92% F
1988: 92% F
1987: 68% F

80. Peace, Steve (D)
Businessman
Elected to the Assembly in 1982.
Member of Water, Parks, & Wildlife.
Imperial County, National City and part of Chula Vista in San Diego County.
1989: 81% F
1988: 67% F
1987: 86% F, 75% C
