CLCV: POLITICAL ACTION FOR ENVIRONMENTAL PROTECTION

The California League of Conservation Voters is the non-partisan political action arm of California's environmental movement. Celebrating its 25th anniversary, CLCV's mission is to protect the environmental quality of the state by working to elect environmentally responsible candidates to state and federal office, then holding them accountable to the environmental agenda.

CLCV conducts rigorous research on candidates and concentrates on the races where our resources can make a difference. We back our endorsements with expertise, assisting candidates with the media, fundraising, and grassroots organizing strategies they need to win. We work to educate voters, then help get out the vote on election day.

CLCV is also a legislative watchdog. Each year, we track scores of environmental bills and votes in Sacramento and work to make sure legislators hear from environmental voters. At session's end we publish the *California Environmental Scorecard* to help voters distinguish between the rhetoric and the reality of a lawmaker's record.

This edition of the Scorecard records the most important environmental votes of the 1997 session. Now in its 24th year, the Scorecard—distributed to 25,000 CLCV members, other environmental organizations and the news media—is the authoritative source on the state's environmental politics.

BOARD OF DIRECTORS

Executive Committee

Dian Grueneich, President

Paul Growald, Chairman

Kimo Campbell, Vice President, Northern CA

Ruth Hunter, Vice President, Southern CA

Ann Notthoff, Endorsements Committee Chair

V. John White, Program Committee Chair

ACKNOWLEDGEMENTS

CLCV thanks the following organizations and individuals for their contributions to the 1997 California Environmental Scorecard: Audubon Society, Californians Against Waste, California Public Interest Research Group, Joe Caves, Clean Water Action, Mark Deitch & Associates, Inc., Environmental Working Group, Aaron Mitchell, Mountain Lion Foundation, Planning & Conservation League, Price Consulting, Sierra Club California and V. John White & Associates.

1997: ENVIRONMENTAL PROTECTION BACK ON TRACK

The 1997 legislative session was the most promising for the environment and public health in a number of years. A record number of pro-environmental bills and a substantial rise in environmental scores among legislators marks an important turn from the anti-environmental legislature of the earlier part of the decade.

New legislators joined seasoned environmental champions in carrying and voting for a wide environmental agenda. There were virtually no anti-environmental bills, a big change from the past five years. This new agenda reflects both public outcry to several years of assault on California's environmental safeguards, as well as the fall '96 elections, which brought to Sacramento a large freshmen class—many of them fresh from elections defined by environmental issues, and prodded by strong public support for the environment.

One of the biggest gains was in the area of coastal protection. The "Coastal Flotilla," a far-reaching package of 36 coastal protection bills ranging from improving coastal water quality standards to protecting public access at beaches, earned 1997 the subtitle: the "Year of the Coast."

However, big business, led by oil companies and other polluters, quickly figured out the dramatic agenda change and launched a public relations campaign to defeat ten key environmental bills. The campaign, perhaps never really meant to reach the public, worked better as a message to the legislature, which in turn abandoned stronger bills. This pressure, combined with veto threats by Governor Wilson, also led many bill authors—committed to passing their bills—to accept weakening amendments.

The result: many good environmental bills were killed in committee, and others were watered down. Legislators thus had less difficulty casting pro-environment votes.

For example, most of the Coastal Flotilla bills were narrowed and weakened in committees and only 22 were passed by the legislature. Governor Wilson, despite an initial "commitment" to coastal issues, then vetoed 7 of them, including some of the most important water quality and anti-pollution measures.

...many good environmental bills were killed in committee, and others were watered down. Legislators thus had less difficulty casting pro-environment votes.

The number one environmental priority this year was AB 278 (Escutia), the Children's Environmental Health Protection Act, a measure to better protect kids from the harmful health effects of pollution by setting health standards at levels that protect children, and increasing monitoring near schools and daycare centers. It garnered bi-partisan support in the Assembly and passed the Senate despite stiff opposition from the oil companies. However, it stalled on the last night of the session, when in a final Assembly concurrence vote a group of Assemblymembers (Dennis Cardoza, Jim Cunneen, Steve Kuykendall, Mike Machado, and Peter Frusetta) bowed to industry pressure and withheld their votes, even though they had voted in June for a stronger version of the bill.

Three high profile environmental issues that were addressed by the legislature are not included in the 1997 Scorecard: renewal of the Smog Check program, MTBE contamination in drinking water sources, and revisions to the California Endangered Species Act. In each case, although the bills received broad legislative support, they were amended in committee so that by the time they reached the floor they either lacked strong enough solutions, or they did not achieve consensus among environmental organizations.

The environmental community applauds the legislature for listening to their constituents and voting for a wide array of measures that have put California back on the track of cleaning up our air and water, and of protecting our environment. However, a number of strong bills are on hold and serious issues remain to be tackled. The legislature needs to build on this year's work and come back next year with a more substantive agenda that challenges polluters and protects our natural resources for future generations. California's voters demand it and our environment deserves no less.

Best & Worst

NEW KIDS ON THE BLOCK: Carrying substantive legislation and providing leadership in key environmental committees, freshmen 100%-ers Assemblymembers Fred Keeley, Ted Lempert, Don Perata, Kevin Shelley and Howard Wayne distinguish themselves as environmental leaders for the future.

GREENEST GOP'ers: Assemblyman Jim Cunneen, retains the title again this year with a score of 83. Runners-up are Assemblymen Brooks Firestone and Steve Kuykendall, both scoring 80. Kuykendall's score proves he's listening to voters after his tight race last fall.

MARCHING TO A DIFFERENT DRUMMER: In a year when almost everyone's score goes up, the average of the Senate Republican caucus stays virtually the same. Even worse, scores for a handful actually take a dive: Assemblyman Bill Leonard (-24), and Senators David Kelley (-18), Dick Monteith (-10), and Richard Mountjoy (-8).

WHAT PLANET DO THEY LIVE ON? Despite strong public support for the environment and record jumps across the board, a group of legislators—many of them repeats from last year—manage rock bottom scores: Assemblymen Dick Ackerman (4), Howard Kaloogian (9), Bill Leonard (9), Tom McClintock (9), Rico Oller (9), Charles Poochigian (9) and Curt Pringle (5), and Senators Raymond Haynes (5), Rob Hurtt (10), Pete Knight (5), John Lewis (5) and Richard Mountjoy (10).

BETTER LATE THAN NEVER: Annually one of the lowest scores, this year Senator Richard Mountjoy surprised environmentalists with his concern for clean drinking water. His MTBE bill, SB 521, was one of the strongest in a generally weak set. We hope he'll be back next year.

BUDGET HEROES: Senator Mike Thompson and Assemblymembers Denise Ducheny, Fred Keeley, Don Perata and Martha Escutia fight behind the scenes on funding for environmental programs during the budget war with the Governor. Pushed through is a new Natural Resources Infrastructure Fund and increases for coastal protection.

GOOD SCIENCE: On the heels of the Wilson Administration's call for scientists to destroy evidence on health problems caused by pollution, Senator Byron Sher and Assemblymember Howard Wayne hold public hearings and craft measures to restore scientific integrity in state agencies.

1997 VOTING INDEX

ASSEMBLY

Average of all Assembly members: 67

In 1996: 44

Average Republican Assembly score: 29

In 1996: 10

Average Democratic Assembly score: 97

In 1996: 86

Percentage of Assembly Republicans scoring 20 or lower: 49

In 1996: 93

Percentage of Assembly Democrats scoring 80 or higher: 98

In 1996: 82

Republican Assembly members with scores of 50 or higher:

Cunneen (83), Kuykendall (80), Firestone (80), Frusetta (62), Pacheco (55), Richter (53), Goldsmith (50)

Democratic Assembly members with scores of 50 or lower: none

Perfect 100s:

Alquist, Aroner, Baca, Bowen, Bustamante, Caldera, Cardenas, Davis, Ducheny, Escutia, Figueroa, Gallegos, Havice, Hertzberg, Honda, Keeley, Knox, Kuehl, Lempert, Martinez, Mazzoni, Migden, Murray, Napolitano, Ortiz, Perata, Scott, Shelley, Strom-Martin, Sweeney, Thomson, Torlakson, Villaraigosa, Vincent, Washington, Wayne, Wildman, Wright

SENATE

Average of all Senators: 67

In 1996: 55

Average Republican Senate floor score: 22

In 1996: 25

Average Democratic Senate floor score: 97

In 1996: 78

Percentage of Senate Republicans scoring 20 or lower: 56

In 1996: 39

Percentage of Senate Democrats scoring 80 or higher: 96

In 1996: 45

Republican Senators with scores of 50 or higher: McPherson

Democratic Senators with scores of 50 or lower: none

Perfect 100s:

Alpert, Ayala, Burton, Hughes, Johnston, Karnette, Lee, O'Connell, Polanco, Rosenthal, Schiff, Sher, Solis, Thompson, Vasconcellos, Watson

THE AGENDA: THE BILLS THAT MAKE UP THE SCORES

- ✓ PRO-ENVIRONMENTAL BILL
- ✗ ANTI-ENVIRONMENTAL BILL
- 👍 PRO-ENVIRONMENTAL ACTION BY GOVERNOR WILSON
- 👎 ANTI-ENVIRONMENTAL ACTION BY GOVERNOR WILSON

AIR QUALITY

1. AIR POLLUTION MONITORING ✓

One of the most serious public health problems facing the state is fine air particulates — inhalable soot from air pollutants. **AB 968 (Knox)** sets up a comprehensive monitoring system for PM 2.5, the greatest health risk of all air particulates.

👍 *Signed into law*

2. HAZARDOUS MATERIALS RELEASE ✓

AB 1190 (Torlakson) would have let local governments be more involved in investigations of hazardous chemical accidents by allowing county health officers to examine witnesses.

👎 *Vetoed*

3. FUNDING FOR CLEANER ALTERNATIVES TO DIESEL ✓

Diesel emissions are a more serious public health threat than gasoline emissions. **AB 1368 (Villaraigosa)** would have created funding and financial incentives to help operators of heavy-duty trucks upgrade their engines to cleaner technologies.

Held in the Senate Transportation Committee.

4. AIR POLLUTION MONITORING ✓

Also addressing the health threats of air pollution, **SB 1306 (Sher)** would have set up an extensive research program—funded by polluter fees—on particulate matter caused by combustion processes, such as diesel engines, as well construction and agricultural operations.

👎 *Vetoed*

COASTAL PROTECTION

5. COASTAL WETLANDS ✓

AB 241 (Lempert) funded a program to develop a community-based wetlands conservation strategy in the south, and a mitigation banking pilot program in the San Francisco Bay.

👎 *Vetoed.*

6. BEACH SAFETY ✓

California beaches were closed for over 1300 days in 1995 due to contamination and 11 beaches were permanently closed. **AB 411 (Wayne)** increases pollution monitoring at public beaches and requires uniform health standards for monitoring programs. It also requires health officials to close beaches when pollution levels are dangerous and sets up a hotline for beach closure information.

👍 *Signed into law.*

7. COASTAL ACCESS ✓

AB 1188 (Lempert) started the session as a bill to protect the public's access to the California coastline by making it harder to give away state-owned accessways to developers. It was defeated in the Senate, then amended and enacted as an unrelated budget bill.

Original Bill Died on the Senate Floor.

8. COASTAL MONITORING ✓

Earlier this year the Resources Agency issued a report concluding that the state lacks a coordinated and comprehensive coastal water quality monitoring program. **AB 1429 (Shelley)** will develop this program.

👍 *Signed into law.*

9. COASTAL ACCESS FUNDING ✓

SB 72 (McPherson) improves public access to the coast by requiring that revenues from coastal development fees, which currently go into the state's general fund, be deposited into a special account dedicated to constructing trails, stairways and other forms of beach access.

👍 *Signed into law.*

ENVIRONMENTAL JUSTICE/ COMMUNITY RIGHT-TO-KNOW

10. INTERNET ACCESS TO PUBLIC HEARING INFORMATION ✓

Public interest groups are often caught by surprise by last-minute documents or hearing time switches. **AB 1169 (Shelley)** would have required the state's environmental agencies to post such information on the Internet.

Held in the Senate Governmental Operations Committee.

11. INTERNET ACCESS TO CAMPAIGN CONTRIBUTION DISCLOSURES ✓

SB 49 (Karnette) allows “digital sunlight to shine on the political process.” The bill makes it easier for the public to follow the money in political campaigns by requiring campaign contribution reports for statewide candidates and ballot initiatives to be available on the Internet.

 *Signed into law.*

12. ENVIRONMENTAL EQUITY IN LOCAL PLANNING ✓

A significant step in stopping low-income and minority communities from becoming the dumping grounds for pollution, **SB 451 (Watson)** would have required local general plans to examine the distribution and locations of polluting facilities in relation to schools and neighborhoods.

 *Vetoed.*

13. ENVIRONMENTAL EQUITY THROUGH CEQA ✓

Also an effort to stop disproportionate pollution impacts on low-income and minority communities, **SB 1113 (Solis)** would have changed California Environmental Quality Act (CEQA) guidelines to prevent too many polluting facilities from locating in these communities.

 *Vetoed.*

ENERGY

14. SOLAR ENERGY FINANCING ✓

AB 1387 (Murray) would create financing to provide loans for qualified homeowners to purchase solar systems.

Held in the Senate Appropriations Committee.

SOLID WASTE / RECYCLING

15. BUILDING RECYCLING LAWS ✓

AB 705 (Strom-Martin) started out as a bi-partisan supported bill to apply recycling laws to state agencies. It was pared down to a measure coordinating waste management programs between state and local agencies, and encouraging the state to buy recycled building products.

 *Vetoed.*

16. RECYCLING HAZARDOUS WASTE IN APPLIANCES ✓

AB 847 (Wayne) sets up accountability procedures to enforce laws that require hazardous waste to be removed from appliances and other scrap metal before they go into landfills.

 *Signed into law.*

TOXICS

17. CHILDREN’S ENVIRONMENTAL HEALTH ✓

AB 278 (Escutia) would bring public health standards for pollution to levels that protect children and increase air pollution monitoring around schools and daycare centers. The number one environmental priority this year, it was narrowly defeated in its Assembly concurrence vote with the help of a handful of legislators who changed their votes. The bill will come up for a reconsideration vote in early January, 1998.

Defeated on a Assembly Concurrence vote; reconsideration granted.

18. NOTICE ON HAZARDOUS WASTE VARIANCES ✓

AB 1157 (Wayne) would have required the state to notify the public 30 days before it issues a variance from hazardous waste regulations to a business. Under current law, the public is notified only after the variance has been granted.

 *Vetoed.*

19. CalEPA PERFORMANCE STANDARDS ✓

Late last year the Wilson Administration drafted a proposal calling for state scientists to destroy certain evidence about health problems caused by toxic chemicals. Public outrage led to public hearings, called by Senator Byron Sher. The outcome was **SB 1320 (Sher)**, which restores scientific integrity at CalEPA by requiring scientific peer review of any new rule proposals.

 *Signed into law.*

TRANSPORTATION

20. LOCAL FUNDING FOR TRANSPORTATION PLANNING ✓

Local governments are increasingly responsible for transportation funding. **AB 595 (Brown)** sets an important precedent by opening up the potential to fund important Bay Area regional transportation projects—especially alternatives to single-driver vehicles—through voter-approved revenues from gasoline taxes.

 *Signed into law.*

WATER QUALITY

21. INLAND OIL SPILL PREVENTION ✓

The benefits of the landmark Oil Spill Prevention and Response Act often end at the ocean's shore, yet spills from the state's countless pipelines and storage facilities into rivers or streams can be even more damaging than sea spills. **AB 667 (Lempert)** would have applied oil spill laws to inland waters.

Held in the Senate Rules Committee.

22. TOXIC "HOT SPOTS" PROGRAM ✓

AB 1479 (Sweeney) aimed to extend and restructure the "toxics hot spots" program, which is set to expire this year. Funded by polluters, the program determines the sources of pollution in bays and estuaries and those responsible for clean-up. It has stalled, largely because the advisory board is dominated by oil and polluter interests, which have caused the pollution in the first place. These same interests were successful in pressuring Governor Wilson to veto the bill.

 *Vetoed.*

23. COASTAL WATER QUALITY ✓

After nearly a decade of Coastal Commission bashing by the Wilson Administration during the annual budget process, **AB 1581 (Keeley)** provides critical funding for the Commission and its work, ranging from grants for coastal communities to finish local development plans, to coastal water quality monitoring programs and computer upgrades.

 *Signed into law.*

24. NONPOINT POLLUTION IN COASTAL WATERS ✓

The number one threat to coastal water quality is polluted runoff, caused by ground contaminants picked up from rain, farm drainage or overflowing lawn sprinklers which travel through urban systems and get flushed into the ocean. **SB 499 (Alpert)** would have given a push to state coastal regulators to implement programs to control "nonpoint" pollution.

 *Vetoed.*

25. CLOSING LOOPHOLES IN WATER POLLUTION LAWS ✓

Under the guise of allowing polluters to corral contamination when cleanup is not technologically possible, the state water board's "containment zone" policy has become a giant loophole for many polluters to avoid cleanup. Strongly opposed by business interests, **SB 661 (O'Connell)** closed this loophole by limiting the ability of the state Water Board to designate containment zones.

*Defeated in the Assembly Appropriations Committee;
Reconsideration granted.*

Notes on the Scorecard

This edition of the *California Environmental Scorecard* evaluates floor votes by the 1997 session of the Legislature on 25 key environmental bills.

Bills listed are not all the environmental bills of the session, but those judged most important by a consensus of the environmental community. (See acknowledgements for a list of participating organizations.) Votes counted for scoring may not be the final rollcall: the Scorecard panel decided which votes were most indicative for each bill.

Pro-environment votes are designated by ✓; anti-environmental votes by X. Members who did not vote are marked NV, and those not eligible for a vote as NE. Final scores are the percentage of pro-environment votes cast, not counting absences. This edition of the Scorecard does not grade legislators for votes cast in committee.
